RE: North Richland Hills 50th Year CDBG Matson Street Recommendation Letter

Dear Wren,

The bid opening of the North Richland Hills 50th Year CDBG Sanitary Sewer Improvements Project for Matson Street was held at the Tarrant County Community Development office on Wednesday, January 15th, 2025 at 10:00 AM. Four formal bids were received and verified for accuracy and omissions. The apparent low bidder is Capital Underground Utilities, LLC with a base bid of \$157,349.00.

After analysis of the full project and following up with the contractor's references, Shield Engineering recommends Capital Underground Utilities, LLC as the contractor. The base bid includes the construction of 772 linear feet of 8" HDPE DR-17 sewer pipe to be installed via pipe bursting as well as Manholes and SS Services. This project also includes point/sag repairs as directed by the City/County. This project will

1. Increase the integrity of the NRH Sanitary Sewer System
2. Remove and replace cracked and decaying vitrified clay Sanitary Sewer Pipe.
3. Reduce overall maintenance costs to the city for this Sewer Line
4. Replace and improve the sewer services for 20 residences.

Please let us know if you have any further questions.

Sincerely,

Max Aransen, P.E.
Shield Engineering Group, PLLC
