

# SmartForce™

## Adventos Corporation Sole Source Statement

Remittance Address: 5600 South Quebec Street, Suite 310D • Greenwood Village, CO 80111 • USA

### **Adventos™ Corporation is the Sole Source Provider of the SmartForce™ Agency Management System Web: [www.adventos.com](http://www.adventos.com)**

Adventos™ Corporation is the sole source vendor of SmartForce™ Agency Management System software product that includes SmartIntel, SmartIA, SmartAdmin, and SmartCommunity. It is the first and only of its kind to combine support for the administrative functions, patrol operations, investigations, crime analysis, and community policing efforts of law enforcement agencies.

SmartForce™ has been created by Adventos™ and can only be purchased directly from Adventos. In addition, Adventos™ is the sole source provider of technical support for SmartForce™.

SmartForce™ is patent pending at the U.S. Patent Office. SmartForce™ is a trademark of Adventos™ and the SmartForce™ source code is copyrighted.

Adventos™ is constantly keeping aware of software applications that may compete with SmartForce™ and their feature sets.

Many of the features and capabilities of SmartForce™ are to our knowledge not shared by any other competing information sharing platform, internal affairs platform, administrative platform, or community-oriented law enforcement platform. These include, but are not limited to:

#### **SmartIntel Module**

- A unique CJIS compliant solution that is responsive, mobile, and real-time. SmartForce™ can be securely accessed by any mobile device.
- SmartForce™ incorporates a user-friendly interface familiar to users of Microsoft Office products.
- SmartForce™ alerts command, supervisors, officers, and analysts of key incidents, operations, officer safety precautions, and administrative announcements.
- SmartForce™ provides key shift briefing notes, trainings, and assignments on an electronic bulletin board. Officers can quickly see items they missed while off-duty and before coming onto shift so they are prepared and directed for success.
- SmartForce™ organizes prolific offender, missing persons, juvenile, gang, and other photo and video libraries for easy access and search.
- SmartForce™ includes a pdf searchable repository of crime pattern bulletins, officer safety bulletins, and other BOLO's used to conduct intelligence-led policing initiatives.
- SmartForce™ accounts for missions, deployments, and ops conducted with real-time posts and updates. Hot-spot, CompStat, Problem-oriented Policing, and other initiatives can be managed through SmartForce™ with ops plans and updated in real-time with officer responses.

- SmartForce™ manages tips and leads as well as major case management. Tips can be assigned and tracked to completion for greater levels of accountability.
- SmartForce™ provides secret and secure collaboration workspaces for investigators, district attorneys, and state/federal partners to collaborate.

### **SmartIA Module**

- SmartForce™ can be configured to meet each agency and jurisdictional policy needs and to include appropriate language from the agency's use of force, complaints, commendations, and pursuit policies.
- SmartForce™ supports mobile entry and management of use-of-force, complaints, commendations, and pursuit incidents from the field as well as attaches body-worn camera video, photos, and other evidence to each report.
- SmartForce™ includes a clickable body-image to capture and easily depict the force contact points.
- SmartForce™ accounts for de-escalation techniques and provides a reporting mechanism on incidents that occurred with and without de-escalation.
- SmartForce™ displays the chronological order of escalation and de-escalation from start to end of the incident instead of supervisors having to determine through the reading of a narrative.
- SmartForce™ routes IA reports through the chain of command with review and approval functions.
- SmartForce™ alerts supervisors of reports that require their review/approval and provides tracking of which supervisor in the chain the report is currently waiting for review and approval.
- SmartForce™ includes reporting and search features that make year-end analysis and freedom of information requests easy to complete in minutes not days. For example, custom reports are easily produced in seconds with the touch of a finger when asked the number of incidents in which a CED was used, the number of incidents involving a particular race, the number of incidents that involved an officer injury, and many other variables of interest.

### **SmartCommunity**

- SmartForce™ coordinates and provides real-time updates and management of Special Events at professional sports venues, protests, concerts, and tourist events.
- SmartForce™ allows for neighboring jurisdiction agencies, business owners, schools, homeowners associations, apartment and hotel managers as well as other community partners to share information in real-time all in a CJIS compliant environment. This secures the information, makes it searchable for future needs, and improves response times vs. using email.
- SmartForce™ manages community requests/complaints ranging from house checks, speeding traffic, suspected drug activity, etc. making it easy for supervisors or command staff to report the activity and responses to these community requests/complaints.

### **SmartAdmin**

- SmartForce™ allows an agency to convert from many paper processes to electronic processes to more effectively and efficiently streamlining common administrative tasks.

- SmartForce™ includes a policy library and the tracking of new and revised policies that must be acknowledged by officers and supervisors throughout the organization.
- SmartForce™ alerts officers via e-mail when a policy needs to be reviewed and acknowledged with their electronic signature from any mobile device.
- SmartForce™ supports mobile entry and management of Field Training Officer and Police Training Officer documents. Trainers and recruits can easily select drop-down boxes, write narratives, and attach photo or video training to daily observation reports, remedial recommendations, and end of phase reports.
- SmartForce™ includes a robust Quartermaster inventory program that tracks everything from laptop computers to guns and other equipment noting if the equipment is in-service or out, who it is checked out to, condition of use, etc.
- SmartForce™ includes a Form library in which the most recent forms are stored to prevent officers from using older draft versions and to help officers access necessary forms faster.

In addition to our many features that are simply not available through other software solutions, we offer User Conferences and additional Training and Software Support and Professional Services (Adventos Assurance©) packages to ensure that your agency receives the level of training needed to gain the most return on your software investment.

At Adventos, we aim to help you work smarter, not harder in the pursuit of making the world a safer place. For more information about our products, features, or company, please contact us at (303) 800-5044 or [www.adventos.com](http://www.adventos.com).
